About Application

Wish to Santa

Make a list and check twice is a Christmas tradition application, where kids' WISH and some exchange gifts with their parents and friends. Kids can write a letter to Santa Claus and parents can send that letter to Santa Claus. Santa Claus can also reply to that letter. It's a wishful kid's application message (Feel free to deliver your wishes to Santa Claus) and Santa Claus can reply to that.

Background

Wish to Santa

Christmas is the most awaited festival for kids and adults. It's a time for getting together. This is a time for gifts and joy. Kids write a letter to Santa Claus and wish for their favorite gifts. Parents can send that letter to Santa Claus. Santa Claus can also reply to that letter. Kids can send their wishlist and gifts to Santa Claus and they can see their wishlist under the gifts and the replies made by Santa Claus.

Design Strategy

Wish to Santa

Knowing the target audience is the key design process was carried out. Keeping the target audience in mind, the design strategy was made. Following are the key points making them create a good application.

Innovative Ideas
Innovative ideas are the key to success. Some innovative ideas are implemented in the application.

Target Audience
Effective targeting of the audience is the key to success. Kids and teens are the target audience.

Cross Channels
Cross channels are used to reach the audience.

Critical Success Factors
Critical success factors are the key to success.

Technology
Technology is the key to success.

Marketing
Marketing is the key to success.

Value
Value is the key to success.

User Research

Wish to Santa

I have research around 10-15 kids for qualitative research and surveyed 300+ kids for quantity research. The survey was conducted in the form of Google Forms. Key user interviewees with different income age groups have been.

Love to spend on presents

Wishful thinking is addictive

Children are smart today

Love spending pocket money

Empathy Map

Wish to Santa

Empathy map helps to understand the user's needs. It helped me get closer to what these people really think and feel about my app, and to understand their behaviors and motivations.

Says
- what is your name?
- how old are you?
- am I nice or a bad?
- do you believe in Santa?
- do you know Santa Claus?
- do you like Santa Claus?
- Who is what gender is Santa?
- how I can find me and talk to search for Snowmen?

Does
- Write a letter to Santa Claus
- Draw a picture of Santa Claus
- Ask parents to help them to write a letter to Santa Claus
- Ask parents to help them to send a letter to Santa Claus
- Ask parents to help them to receive a letter from Santa Claus
- Ask parents to help them to receive gifts from Santa Claus

Thinks
- Santa Claus is real
- Santa Claus is not real
- Santa Claus is nice
- Santa Claus is not nice
- Santa Claus is good
- Santa Claus is not good
- Santa Claus is kind
- Santa Claus is not kind
- Santa Claus is friendly
- Santa Claus is not friendly

Feels
- Excited
- Happy
- Sad
- Angry
- Fear
- Surprise
- Disgust
- Trust
- Anticipation

User Interview

Wish to Santa

I have talked to 15-18 interviews from the target group of 5-12 years old kids. Some of the interviews were conducted in person and some were conducted online. Following are the key points.

- what is your name?
- how old are you?
- am I nice or a bad?
- do you believe in Santa?
- do you know Santa Claus?
- do you like Santa Claus?
- Who is what gender is Santa?
- how I can find me and talk to search for Snowmen?

Affinity Mapping

Wish to Santa

Affinity mapping is a tool that can be used by groups as a sense of where much people (Gaining to Succeed, Users) at Affinity Diagram for gather opinions or issues and organize them into groupings that reveal natural relationships around the issue.

Children | Parents | Santa Claus

Persona

Wish to Santa

Persona helps to understand the targeted users. I created a user persona to help understand the primary needs & challenges. This helped me to create a design that addresses the user's needs.

Mahak
Age: 10 Years
Gender: Female
Occupation: Student
Needs: Loves Art

Mahak is a kid and loves to draw and color a lot. She loves to write letters and enjoys getting to receive letters from Santa Claus. She loves to receive gifts from Santa Claus.

Frustrations
- Mahak is annoyed if her letter to Santa Claus is not delivered.
- Mahak is annoyed if she doesn't receive gifts from Santa Claus.

UX Needs
- Visually appealing
- Simple Language
- Easy to Learning

Devices
- Mahak prefers to use phone devices a lot.

Journey Map

Wish to Santa

Journey map helps to understand the typical interactions with how like to get with the application. It helps to understand the user's experience while interacting with the product, while the points with the help of user journey map.

User Flow

Wish to Santa

Start
Wish to Santa
Request Santa Claus to send a letter
Request Santa Claus to send a gift
Request Santa Claus to send a reply
Request Santa Claus to send a wish
